SNP/SNZ SERIES ROCK CRUSHING PLANTS
30-200TPH

PGK Series Primary Crushing Units

PGK Series

These rugged, primary crushing units are built to withstand hours of continuous operation. All components feature proven strength and durability.
Coarse-crushed aggregate may be used without further processing as crusher-run for civil works.
Electric motor drive and a jaw crusher with a grizzly feeder are standard. Diesel-engine drive is available as an option.

Model	Jaw Crusher	Grizzly Vibrating Feeder		Motor Power (kW)	Max.Feed Size	Crushing Capactiy (TPH) Open-Side Setting (OSS) (mm)												
		Model	Size,W×L			50	60	70	80	90	100	110	120	130	140	150	160	
PGK-4M	AC2415	GVF718	700×1800	31.7	10-1/2”	30	37	45	54	64	74							
PGK-5M	NCF3018	GVF820	800×2000	48	12-1/2”			60	70	80	90	100	110					
PGK-6M	SK3624	GVF1030	1000×3000	86	17”				88	100	112	123	134	146	157	168		
PGK-7M	RC4228	GVF1230	1200×3000	125	21”						141	155	170	187	202	218	233	

PVN/PVH Series Secondary Crushing and Screening Units

PVN/PVH Series

These secondary crushing and screening units form a large-capactity, smooth-running plant when combined with the PGK primary crushing units.
The cone crusher and screen are mounted on a rigid chassis that is supported by pneumatic-tire wheels. When a large amount of a small, granular aggregate is required, a fine-type cone crusher can be mounted.
Extra-fine jaw type is also available as PVH model for small-scale crushing operations.

Model	Cone Crusher	Vibrating Screen		Motor Power (kW)	Max.Feed Size	Crushing Capactiy (TPH) Closed-Side Setting (CSS) (mm)				
		Model	Size,W×L			15	20	25	30	35
PVN-1M-3	NCP3005	NSR5103	1500×3000	59.4	4”	47	54	61	70	
PVN-2M-3	NEM40H	NSR5143	1500×4200	138.52	6-1/2”		135	150	165	
PVN-3M-3	NEM54H	NSR6163	1800×4800	147	8”		180	225	260	290

Model	Jaw Crusher	Vibrating Screen		Motor Power (kW)	Max.Feed Size	Crushing Capactiy (TPH) Closed-Side Setting (CSS) (mm)			
		Model	Size,W×L			10	15	20	25
PVH-3FM-3	HF406	NSR483	1200×2400	50.5	2”-1/2	30	39	52	65
